DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to a process for producing methane or hydrogen, comprising compressing the mixture of gases produced in an anaerobic digestion and either removing CO₂ or H₂S or generating hydrogen, classified in class 435, subclass 267.
- II. Claims 12-28, drawn to a methane or hydrogen generation system, comprising an anaerobic digester, a compressor, a mixed-gas-driven generator, and either a mixed gas purification device or a hydrogen generation and removal system, classified in class 435, subclass 303.2.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process of Group I may be carried out with just a vessel in which anaerobic digestion can occur, a compressor for compressing the gases produced, and a device for either removing CO₂ or H₂S or for generating hydrogen. The apparatus recited in the claims of Group II are not required. Therefore, these inventions are therefore patentably distinct.

Art Unit: 1651

Additionally, the search for any one group is not coextensive with the search for the other group, thereby creating an undue burden of search and examination. Burden lies not only in the search of U.S. patents, but in the search for literature and foreign patents and in the examination of the claim language and specification for compliance with the statutes concerning new matter, distinctness and scope of enablement. Further, the different groups have acquired a separate status in the art, as shown in part by their different classifications. Because these inventions are distinct for the reasons given above, restriction for examination purposes as indicated is clearly proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
